The Chapter Objectives:

Our main objective is to spread the knowledge and understanding of reflexology to society as well as to the medical field, so it would be recognized and accepted as a beneficial component to the general health and well-being of all (at least on the level that massage therapy is recognized).

To provide an environment of support and friendship to new as well as practising practitioners.

To offer opportunities for continued learning.

Many invitations to present Reflexology to Health Fairs, private clubs and groups.
